original commissioners anticipated in the 1840s would mean a steady supply of students, an ever-growing population of urban poor supply it with variously depicted plagues of masturbators, monomaniacs, erotomaniacs, paretics, degenerates, schizophrenics, defective immigrants, low to high-grade morons, and feeble-minded women. The doctors play fast and loose not only with these diseases but also with the poor who seem to be especially vulnerable to them, and whose diseases it is difficult if not impossible to distinguish from poverty. The diseases vary with the role of the Asylum in professional imagination, but their epidemic and endemic character remains constant.
